

MX5+ HeliLadder - Out of the Box Assembly

Required Tools: #2 Phillips Screwdriver and 3/8" Wrench

Scan this QR code to view our introduction video!

Attach Rubber Bumpers

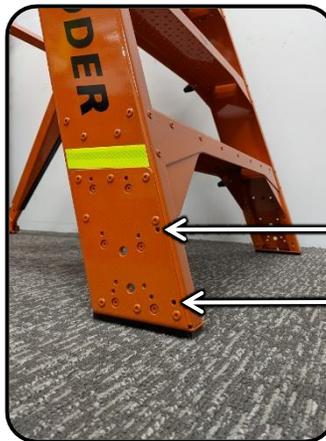

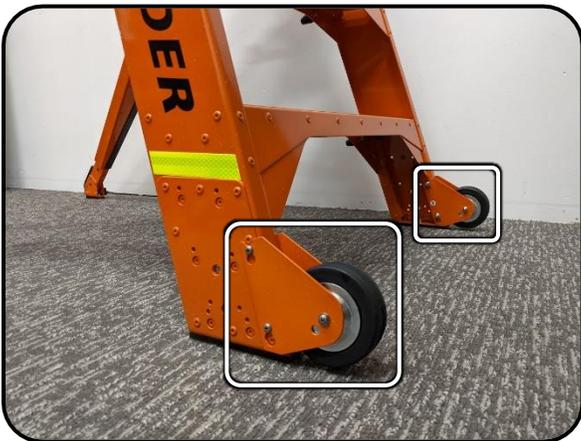

Rubber Bumpers

Install rubber bumpers (2) with the provided hardware. Do not overtighten or bumpers will start to deform.

Handwheel Stowage

Handwheels can be placed in each keyhole slot when not in use.

Attach Wheel Kit

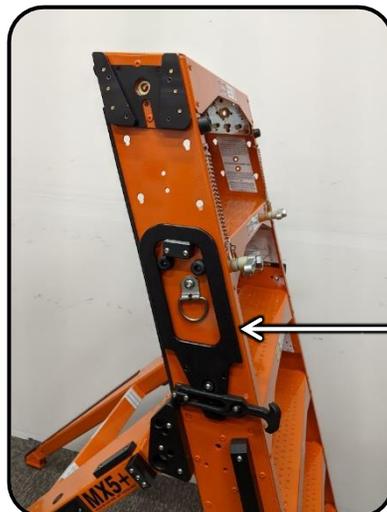

Wheel Kit

Install wheel kits with the provided hardware. Heads of screws should remain on the outside of the ladder.

Note: 4" wheels are depicted in the left image, though the process will remain the same for 3" wheel kits.

3-Piece Tool Tray Set & Short Handrail Kit

3-Piece Tool Tray Set

Side tool trays (2) can be used with the MX5+ in its base configuration, service deck guardrails, and with any extension. Rung tool trays (1) will fit the MX5+ and 2', 3', 4', 5' extensions.

Short Handrail Kit (SHK)

Short handrail kits are ideal for when the MX5+ is in its base configuration. If an extension or service deck is to be installed, store SHK on side of ladder.
